DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-12, drawn to a low molecular weight adenosine A3 agonist, classified in class 424, subclass 546.
- II. Claims 13-16, drawn to methods of therapeutic treatment, classified in class 424, subclass 546.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I and II are related as product and process of use.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the therapeutic methods can be practiced with a materially different product such as a conventional antineoplastic agent, such as 5-FU.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
